

Lab 8
File Handling

Instruction: Create an assembly program that will read a .txt file (file.txt) and display its contents on the screen in a modified form as follows:

- a. All lowercase characters must be converted to uppercase characters.
- b. All uppercase characters must be converted to lowercase characters.
- c. All special characters must be replaced with a blank space.
- d. All numbers must be retained.

The modified contents must also be written to another file (new.txt). Maximum number of characters in a file is 1000.
